

Introducing BlueBox Lite

**THERMO KING'S NEW
VEHICLE-POWERED TRUCK
TELEMATICS SOLUTION
FOR B-, V- AND VX-SERIES
UNITS.**

Receive critical controller information along with temperature, position, and other crucial data in near real-time thanks to 4G connectivity and high logging frequency. Access the data via our cost-effective TrackKing subscription.

The BlueBox Lite device does not require the installation of an additional data logger, as it's conveniently connected to your DSR controller.

For compliance with the EN12830 European standard, just add the TouchLog data logger.

Furthermore, it allows you to integrate the collected data from the vehicle-powered unit into any third-party website or back-end system.
