

UT SPECTRUM

Multi-temperature self-powered refrigeration system for undermount applications on trucks and draw-bar trailers

Excellent performance and reliability
Low Total Cost of Ownership
Ease of use for error-proof operation
Reduced environmental impact

UT Spectrum

Ideal for multi-temperature urban distribution

The Thermo King UT range has been developed specifically for undermount applications on trucks and draw-bar trailers. The UT series has now been extended to include the UT Spectrum model to provide multi-temperature flexibility for distribution operations where low noise is critical. The UT Spectrum provides total protection for both fresh and frozen goods in a range of two- and three-compartment configurations.

Benefits to you

- Benchmark reliability in tough distribution operations
- The flexibility of carrying products at three different temperatures in one vehicle
- Fast pull-down and temperature recovery
- Full two-year warranty
- Advanced TSR-3 controller
- Low fuel consumption

Benefits for the environment

- Whisper-quiet operation for urban access
- R-452A refrigerant delivers reduced Global Warming Potential (GWP) for a 45% reduction in environmental impact
- Multi-temperature configuration means greater vehicle utilisation and therefore fewer vehicles on the road
- Clean, dependable GreenTech™ engine cuts exhaust emissions

Why choose the UT Spectrum?

Designed for the toughest urban distribution cycles:

- ✓ Proven to protect fresh and frozen loads during multi-drop operations
- ✓ Adaptable multi-temperature capability to maximise fleet utilisation
- ✓ Faster pull-down to ensure cargo quality is maintained especially in case of frequent door openings
- ✓ Proven reliability through extensive field trial and laboratory test hours
